Pioneer Network's Small House Webinar Series

Sponsored by the Robert Wood Johnson Foundation

Has your organization been considering renovating into or building households, Green Houses or other small house models?

Are you interested in learning more about these new long-term care options?

Here is your chance to learn from some of the leading experts in the field. *Creating Home: Pioneer Network's Small House Webinar Series* is open to all in the field of aging as well as those in other related health and social service areas who embrace small houses and smaller environments as ways to create home for those needing long-term care.

Our goal is to create a virtual meeting place so that those who have an interest in the financing and delivery of person-directed care through small houses and those who have experience providing related services to other population groups can begin working together and learning from one another.

Convenient and Affordable Take advantage of our special series price to create your own dynamic and interactive seminar series — *without leaving home*. As long as everyone is in the same location, the price is the same. Invite as many people as you want.

Register Today at www.PioneerNetwork.net

The fee for the full series of three is \$110 (use coupon code:ValuePlus). Two sessions for \$90 (use coupon code:Value) or one for \$59. **Space is limited! Registration is only available online.**

Let's Keep the Conversation Going!

Following the series, *Creating Home* webinar participants are invited to continue the dialogue in Pioneer Network's new small house virtual meeting place, **House to Home: Pioneering Conversations on Small Houses**. There, all stakeholders will come together to share expertise, strategically plan and learn more about the issues that need to be addressed to effectively transform the long term care system into small households or home settings. This forum will be launched after the March 19th webinar. Visit www.PioneerNetwork.net for more information.
