

TRAINING OPPORTUNITIES FOR RETIREMENT FACILITIES PROFESSIONALS

Energy Management & Controls *Online Course*

This course is part of the online Retirement Facilities Technician certificate program. Healthcare organizations spend over \$8.3 billion on energy each year to meet patients needs. A well-maintained facility can save up to 5% in energy costs.

Course benefits include:

Gain and develop energy management strategies for HVAC, lighting, auxiliary, and electrical control systems.

Understand the operation and maintenance of building control applications and devices along with computer control systems.

Learn how to evaluate and optimize your current system to create the best energy management plan for your facility.

12 Chapters Focus On:

- Heating & Control Systems
- Air Handling & Ventilation Systems
- Energy Management Opportunities for HVAC Systems
- Lighting Systems, Electrical Systems, and Retrofitting
- Establishing Standard Operating Procedures
- Energy Management Control Systems, Computers, and Microprocessors
- Planning and Implementing an Energy Management Program
- Calculating the Financial Value of an Energy Management Program
